

Crafting Your Next Ten Year Project

Step 1: Identify Your Core Goals

Below are some questions designed to help you identify core projects that could evolve into long-term endeavors. Take time to reflect on these questions, and use your responses to distill the **key projects** you want to focus on. Check if they align with your overall vision and the areas in life where you're most excited to grow.

What excites you most in your life?

In which areas do you want to grow (personally, socially, creatively, financially, professionally or otherwise)?

What do you want your friends and family to know you best for?

Step 2 + 3: Break Down the Journey and Create Checkpoints for Progress

For each key project you identified, it's crucial to break them down into manageable milestones. Below is a simple structure to help you transform your ambitions into yearly goals. Don't worry about being too detailed right away—just create a draft plan with clear, achievable targets for each year. As long as you have some actionable steps, you'll be able to maintain focus and adjust as you go! Use as many of the ten years as you think you need.
